

PROTECT YOUR COMPUTER

If you own a PC you must have security. Most people think that they cant get affected with viruses, spam, hackers, etc... as long as they go to specific web sites c rarely use their internet, well they are wrong. You might not know you are infected, some symptoms are that your PC will run slow, shut off, or eventually crash. T solution? Get protection, purchase a Internet Security package with as many security controls that covers your type of PC. Below is a list of security software for the 2006 year.
